**Keywords:** - Contemporary Management, Modern Education, Enterprise Resource Planning, Express mail services, change, resources, technology tools.

## **Introduction**

Modern Education is the imparting and acquiring of knowledge through contemporary management and learning, especially at different levels with planning, leading and controlling. The Modern educational processes involved sharing information, skills of science and technology, new ideas, creativity, fun activities and innovation with a new platform of leading and learning. Contemporary management developed with modern education to change the

system with technology at different levels of working in different organizations. As the needs of the organization are changing, they are moving forward to applying Contemporary management with the modern education system of learning and applying the changes for effective working. And this change should be accepted by the organization easily (1).

The “contemporary management” indicates the relation to the present and the latest development of trends in the sphere of modern education. It means that the person who is involved in contemporary management should be aware of the recent working ideas and organize the changes in education. Modern managers should be flexible and extensible so that they are ready to incorporate the newest developments in practice. The concept is having a great effect on education and management (2, 3).

## **Objective**

The aim and objective of modern education with contemporary management are to create effective learning with the development of planning, organizing, leading and full controlling within the management. Creating, enhancing and maintaining a positive image of the organization to showing the effective working and a co-operative channel with techno and environment-friendly education and contemporary management.
