

About:

In the modern era various technologies have come together to generate new technologies for benefit of mankind. Researchers have worked for converging two or more technologies in socio-economic interest.

The mission of **International Journal of Convergence of Technology and Management (IJCTM)** is to provide a platform for quality research to be publicized and published to global audience. It aims to promote universal access with equal opportunities for international scientific community; to scientific knowledge, and the creation, and dissemination of scientific and technical information. The motive and aim of journal is to create awareness, re-shaping the knowledge already created and challenge the existing theories related to the field of Academic Research in Convergence of various technology and their management issue.

IJCTM has a primary aim to publish novel research being conducted and carried out in the domain of Technology and Management as a whole. It invites Engineering Professors, Researchers, Professionals, Academicians and Research Scholars to submit their novel and speculative ideas in the domain of Technology and Management in the shape of research articles, book reviews, case studies, review articles, white papers and personal opinions that can benefit the technology and management researchers in general and society as a whole.

As stated earlier, the emphasis is given on all the aspects that can be covered in the domain of Technology and Management, so we welcome all the Stakeholders of Businesses, Engineering, Scientists and Society as a whole to come forward with their new ideas and researches and submit us their articles from anywhere in the world. The name IJCTM does not just restrict our audience from any specific country but we are of view that research and knowledge is boundary less and keeping in view that perspective.
